Press Release

Servisair launched Servisair Deicing Services Inc.

Servisair Inc., a leading global provider of aviation ground services, announced today that it has launched a new deicing/anti-icing focused company, Servisair Deicing Services Inc. (SDS). SDS will encompass Servisair's current centralized deicing operations at Toronto Pearson International and Winnipeg James Armstrong Richardson International airports, as well as future deicing/anti-icing business in Canada.

"We feel that this strategic move will allow us to better promote our leadership at a global level. Our goal is to leverage our expertise by branding SDS as a distinct business from Servisair Ground Handling," said Audrey Laurin, Regional Vice-President, Servisair. "We plan to dedicate all necessary resources to expand our service offer while continuing to deliver outstanding services to our Airport and Airline Customers."

Servisair is a leading global provider of aviation ground services delivering an integrated range of handling solutions across 118 locations worldwide. Servisair's team of 15,000 dedicated employees work around the clock to look after the needs of our 500 customers, handling 1.1 million aircraft movements, 106 million passengers and 650,000 tonnes of cargo per year. Servisair forms part of the **Derichbourg Group**, which also has divisions in Corporate and Environmental Services, collectively employing 42,000 staff throughout 23 countries and generating consolidated revenues of €3.7 billion.
