Derichebourg Environnement wins its first sorting center operating contract

The Derichebourg group has won its first selective sorting center operating contract, thus adding to its current range of services (recycling and waste recuperation, household waste collection, urban cleaning, waste center management, water management, cleaning, public lighting, green spaces) to expand its offer to local and regional authorities.

Derichebourg Environnement began operating the Vitré sorting center (Ille-et-Vilaine, France) on January 1, 2017 on behalf of the SMICTOM Sud Est 35 and SMICTOM Pays de Fougères waste utilities. This sorting center located in Brittany processes 12,000 tons annually of selectively collected waste from 121 municipalities of the Ille-et-Vilaine department of France, covering a population of 207,000.

This contract is set for a minimum duration of five years, and is worth a total of €10 million.

As part of its offer, Derichebourg Environnement plans to invest more than €1.2 million in modernizing the sorting line. The group will add an optical sorting system and an eddy current to the existing installations (hopper, bag opener, trommel, ballistic separator, overband and sorting cabin). This equipment will help optimize sorting performance and the quality of sorted materials. This project will be carried out in partnership with Vauché.

The Derichebourg group is dedicated to improving working conditions for its employees. It has therefore chosen, in partnership with the client, to include the renovation of the sorting cabin in this project. The cabin will be equipped with improved ventilation, noise and temperature protection, an anti-fatigue mat, etc.

The Derichebourg group is a key player providing services to businesses and municipalities in the international arena.

With more than 34,000 employees in 14 countries on three continents, Derichebourg registered €2,147.5 million in revenue in fiscal year 2015-2016.

Derichebourg rolls out its globally recognized expertise in two complementary business sectors:

- environmental services (recycling, waste recuperation, household waste collection, urban cleaning, waste center management, sorting centers, water treatment, etc.),
- business services (cleaning, energy, temporary staffing, aeronautics, services in sensitive environments, etc.).

Derichebourg is listed on Euronext Paris, compartment B, and is a member of the CAC All Shares index. ISIN code: FR0000053381 - ticker symbol: DBG.
